

AutoNexus — Manufacturing RCA/CAPA Report

Vehicle: VEH001 | Seat Leon | Owner: Vehicle Owner | Generated: 2026-04-05 11:30

Vehicle Summary

Status:	CRITICAL	Mileage:	36,760 km	Brake Temp:	106.4°C
Oil Pressure:	15.3 psi	Engine Temp:	84.9°C	Brake Fluid:	61.7%
Tire Pressure:	22.2 psi				

■ Brake System

Problem Detected:	Temperature 106.4°C (critical > 100°C)
Root Cause:	Worn brake pads or seized caliper causing excessive heat
Corrective Action:	Replace brake pads, inspect calipers
Preventive Action:	Monthly brake fluid check

■ Engine Oil

Problem Detected:	Pressure 15.3 psi (critical < 25 psi)
Root Cause:	Oil degradation from extended service interval or high mileage
Corrective Action:	Immediate oil change + filter replacement
Preventive Action:	Oil change every 5,000 km

■ Brake Fluid

Problem Detected:	Level 61.7% (critical < 65%)
Root Cause:	Moisture absorption over time reducing fluid level
Corrective Action:	Top up brake fluid immediately
Preventive Action:	Check brake fluid every 10,000 km

■ Tire Pressure

Problem Detected:	Pressure 22.2 psi (critical < 28 psi)
Root Cause:	Slow leak or temperature-related pressure drop
Corrective Action:	Inflate tires to 32 psi
Preventive Action:	Monthly tire pressure check
