

AutoNexus — Manufacturing RCA/CAPA Report

Vehicle: VEH004 | Nissan Altima 2021 | Owner: Kavya Reddy | Generated: 2026-04-26 13:53

Vehicle Summary

Status:	CRITICAL	Mileage:	86,872 km	Brake Temp:	100.3°C
Oil Pressure:	20.4 psi	Engine Temp:	80.0°C	Brake Fluid:	62.6%
Tire Pressure:	21.7 psi				

■ Brake System

Problem Detected:	Temperature 100.3°C (critical > 100°C)
Root Cause:	Worn brake pads or seized caliper causing excessive heat
Corrective Action:	Replace brake pads, inspect calipers
Preventive Action:	Monthly brake fluid check

■ Engine Oil

Problem Detected:	Pressure 20.4 psi (critical < 25 psi)
Root Cause:	Oil degradation from extended service interval or high mileage
Corrective Action:	Immediate oil change + filter replacement
Preventive Action:	Oil change every 5,000 km

■ Brake Fluid

Problem Detected:	Level 62.6% (critical < 65%)
Root Cause:	Moisture absorption over time reducing fluid level
Corrective Action:	Top up brake fluid immediately
Preventive Action:	Check brake fluid every 10,000 km

■ Tire Pressure

Problem Detected:	Pressure 21.7 psi (critical < 28 psi)
Root Cause:	Slow leak or temperature-related pressure drop
Corrective Action:	Inflate tires to 32 psi
Preventive Action:	Monthly tire pressure check
