

AutoNexus — Manufacturing RCA/CAPA Report

Vehicle: VEH009 | Seat Leon | Owner: Vehicle Owner | Generated: 2026-04-05 11:53

Vehicle Summary

Status:	CRITICAL	Mileage:	6,672 km	Brake Temp:	109.4°C
Oil Pressure:	17.2 psi	Engine Temp:	86.7°C	Brake Fluid:	60.7%
Tire Pressure:	22.1 psi				

■ Brake System

Problem Detected:	Temperature 109.4°C (critical > 100°C)
Root Cause:	Worn brake pads or seized caliper causing excessive heat
Corrective Action:	Replace brake pads, inspect calipers
Preventive Action:	Monthly brake fluid check

■ Engine Oil

Problem Detected:	Pressure 17.2 psi (critical < 25 psi)
Root Cause:	Oil degradation from extended service interval or high mileage
Corrective Action:	Immediate oil change + filter replacement
Preventive Action:	Oil change every 5,000 km

■ Brake Fluid

Problem Detected:	Level 60.7% (critical < 65%)
Root Cause:	Moisture absorption over time reducing fluid level
Corrective Action:	Top up brake fluid immediately
Preventive Action:	Check brake fluid every 10,000 km

■ Tire Pressure

Problem Detected:	Pressure 22.1 psi (critical < 28 psi)
Root Cause:	Slow leak or temperature-related pressure drop
Corrective Action:	Inflate tires to 32 psi
Preventive Action:	Monthly tire pressure check
